(U) Introduction

(U) Authority

(U) Intelligence Community Directive (ICD) 710, Classification and Control Markings System, dated 11 September 2009, establishes the Intelligence Community (IC) classification and control markings system as a critical element of IC procedures for protecting intelligence and information (hereinafter referred to as "information"), and sources and methods while ensuring that information is available without delay or unnecessary restrictions. The classification and control markings system enables information sharing while protecting sources, methods, and activities from unauthorized or unintentional disclosure. The markings system includes all markings added to classified and unclassified information to communicate one or more of the following: classification, compartmentation, dissemination controls, disclosure or release authorizations, and other warnings.

(U) This marking system augments and further defines the marking requirements for portion marks and the overall classification banner line established in Executive Order (EO) 13526 and the companion Information Security Oversight Office (ISOO) Implementing Directive (32 CFR Parts 2001 and 2003). This system does not stipulate or modify the classification authority information required by EO 13526 and the ISOO Implementing Directive; any guidance related to classification authority is reproduced in this Manual only for completeness and user understanding.

(U) The classification and control marking system is maintained and implemented through the Controlled Access Program Coordination Office's (CAPCO) *Authorized Classification and Control Markings Register* (hereafter referred to as *Register*) and the accompanying *Intelligence Community Classification and Control Markings Implementation Manual* (hereafter referred to as *Manual*). Together these documents define and describe the IC's classification and control markings system. The IC classification and control markings system prescribes a standard set of markings to be applied explicitly and uniformly to human-readable information, to include information in an electronic environment "rendered" or displayed for human consumption. Heads of IC elements may submit requests for waivers to markings, formats, or authorized abbreviations in writing to CAPCO for Director of ODNI/ONCIX/SEC/SSD consideration.

(U) Purpose

(U) The *Register* identifies the authorized classification and control markings, abbreviations and portion marks for classified and unclassified intelligence and information. It provides the allowable vocabulary for all information markings and other non-IC markings to control the flow of information. The *Register* provides a list of the human-readable syntax for these markings, regardless of medium (e.g., text, image, graphics, electronic documents including web page, etc.). Refer to the IC Chief Information Officer ICTechSpec 500.D.2 (current version), *XML Data Encoding Specification for Information Security Marking Metadata* for the machine readable syntax and business rules to encode information security marking metadata in XML.

(U) While not the policy basis for individual agencies' use of any particular marking, the *Register* cites the applicable authority(ies) and sponsor for each marking. Some of the Dissemination Control Markings and Non-Intelligence Community Dissemination Control Markings are restricted for use by specific agencies. They are included in the *Register* to provide guidance on handling information that bears them. Their inclusion in the *Register* does not authorize other Agencies to use these markings. Further information is provided in the "Relationship to Other Markings" column of the *Register*.

(U) Non-US Protective Markings and Joint Classification Markings are restricted to the respective countries and named international organizations. Non-US Protective Markings are used to translate (as appropriate) protective markings received from international organizations (e.g., NATO) or foreign governments. Joint Classification Markings are restricted for use on information which is owned or produced by more than one country and/or international organization.

(U) Unpublished markings of controlled access programs are retained in a separate unpublished *Register* maintained by CAPCO. Additionally, the *Register* does not include markings that only indicate addressing or routing of information. Contact the CAPCO staff if you have questions regarding these items.

(U) Applicability

(U) The *Register* applies to the IC, as defined by the National Security Act of 1947, as amended, and such other elements of any other department or agency as may be designated by the President, or designated jointly by the DNI and the head of the department or agency concerned, as an element of the IC. When established by written agreement or understanding, this Register also applies to Federal departments and agencies; state, local and tribal governments; private sector organizations; and other non-IC elements that handle, store, or disseminate intelligence information.

(U) Marking Structure and Formatting

(U) Marking Structure

(U) The IC classification and control marking system has nine categories of markings as follows:

- | | | |
|--|---|---|
| <ol style="list-style-type: none"> 1. US Classification Markings 2. Non-US Protective Markings 3. Joint Classification Markings | } | <i>Required on classified documents and unclassified documents
with dissemination controls - Items 1-3 are mutually exclusive</i> |
| <ol style="list-style-type: none"> 4. Sensitive Compartmented Information (SCI) Control System Markings 5. Special Access Program Markings 6. Atomic Energy Act Information Markings 7. Foreign Government Information Markings 8. Dissemination Control Markings 9. Non-Intelligence Community Dissemination Control Markings | | |

(U) Formatting

(U) Portion marks must always be placed at the beginning of the portions, immediately preceding the text to which it applies. This position affords maximum visibility to the reader. Portion marks must be enclosed in parentheses. Portion marks must use the same order and separators (i.e., slashes, hyphens, commas, etc.) as are used for the banner line.

(U) For US information, the first value of a banner line or portion mark is always the US classification marking. For Non-US or JOINT information, the US classification is left blank and the banner line and portion mark always starts with a double forward slash followed by the Non-US classification level or JOINT classification marking. The banner line shall always have the classification marking spelled out; no abbreviations are authorized.

(U) SCI control systems shall follow if applicable, preceded by a double forward slash. SCI control systems and their compartments shall be kept together, separated by a hyphen. SCI control system compartments and their sub-compartments shall be kept together, separated by a space. Multiple SCI control systems shall be separated from each other by a single forward slash. All SCI control systems, compartments within control systems, and sub-compartments within compartments shall be ordered alpha-numerically (this ordering guidance applies for both published and unpublished markings). An example may appear as TOP SECRET//SI-G ABCD DEFG-MMM AACD//ORCON/NOFORN where G and MMM are SI compartments, ABCD and DEFG are subcompartments of G, and AACD is a subcompartment of MMM.

(U) Special Access Programs shall follow, if applicable, preceded by a double forward slash. Special Access Required program identifiers in the SAP category are listed in alphabetic order separated from one another by a single forward slash and a repeating "SAR-", e.g., TOP SECRET//SAR-CYH/SAR-APPLE//NOFORN.

(U) Atomic Energy Act Information Markings shall follow, if applicable, preceded by a double forward slash. Multiple AEA markings shall be separated by a single forward slash. AEA Information markings and their subsets shall be kept together, separated by a hyphen. Sub-markings within a subset are to be kept together separated by a space. An example may appear as SECRET//RD-SIGMA 1 5/FRD//NOFORN.

(U) Foreign Government Information markings shall follow, if applicable, preceded by a double forward slash. Multiple FGI countries shall be separated by a single space. Trigraph codes shall be listed first alphabetically, followed by tetragraph codes listed alphabetically, e.g., SECRET//FGI GBR JPN NATO//REL TO USA, GBR, JPN, NATO.

(U) Dissemination controls shall follow preceded by a double forward slash. A single forward slash with no space interjected shall be used to separate multiple dissemination controls. Dissemination controls and their subsets shall be kept together, separated by a hyphen. US and JOINT (US is co-owner) classified information **shall be** explicitly marked for appropriate foreign disclosure or release at the portion and banner level per ICD 710, § G.

(U) All applicable markings shall be applied in the order in which they appear in the *Register* with the exception of the SCI and SAP categories in which markings are to be ordered alpha-numerically within each category. See ordering guidance above for SCI and SAP categories. Only applicable marking categories are to be used, no placeholders are required for categories which are not applicable.

(U) Figure 1, below provides a graphic representation of the marking structure, order, and formatting described in this section and provided in the *Register*.

(U) Figure 1 – Marking Structure and Formatting

(U) Resources

(U) The *Register* is available electronically at the following locations:

- **CAPCO Homepage:**

Intelink-TS: <http://www.intelink.ic.gov/sites/dnissc/capco>

Intelink-S: <http://www.intelink.sgov.gov/sites/ssc/capco>

- **DNI SSC FOUO Information Portal:** Send an e-mail to dni-ssc-help@ugov.gov and provide in the subject line of the e-mail "Request access to the SSC Portal". Potential users will receive an e-mail with further instructions.

(U) The classified *Register* annexes are also available on the CAPCO websites and include:

- *CAPCO Register Annex A* – Tetragraph Table, Registered International Organizations and Alliances (classified, releasable)
- *CAPCO Register Annex B* – Tetragraph Table, Registered International Organizations and Alliances (classified, NOFORN)

(U) Note: The Markings History and Banner Line Syntax History and Miscellaneous Banner Marking Examples sections available in previous *Register* versions have been removed and will now be available only in the *Manual*. This change reduces duplication of information across the two documents and the overall size of *Register*.

(U) For additional information, questions, or comments on these guidelines, please contact the CAPCO/CCM office by e-mail on JWCIS at DNI-SSD-CAPCO@dni.ic.gov, or directly at:

1. (U) US Classification Markings

(U) Classified information, as defined by and under the purview of ICD 710, shall be explicitly marked for appropriate foreign disclosure or release at the portion and banner level. Originators of information are responsible for determining appropriate classification markings for the information they produce, and for applying the appropriate control markings that implement DNI guidelines for dissemination (foreign and domestic).

(U) ICD 710 is not applicable to classified military information falling under the purview of National Policy and Procedures for the Disclosure of Classified Military Information to Foreign Governments and International Organizations (short title: National Disclosure Policy-1 (NDP-1)). Within the Department of Defense, application of foreign release markings is accomplished by the Foreign Disclosure Officer (FDO) when foreign release is needed.

(U) For additional information regarding US Classification Markings refer to the *Manual*.

(Table is UNCLASSIFIED)

Marking Title	Authorized Abbrev	Authorized Portion Mark	Marking Sponsor	Policy Basis	Relationship to Other Markings
US Classification Markings					
TOP SECRET	None	(TS)	Original Classification Authority (OCA)	a) EO 13526, §1.2(a) b) ISOO Implementing Dir., §2001.24(a) c) ICD 710	May not be used with any other classification marking.
SECRET	None	(S)	OCA	a) EO 13526, §1.2(a) b) ISOO Implementing Dir., §2001.24(a) c) ICD 710	May not be used with any other classification marking.
CONFIDENTIAL	None	(C)	OCA	a) EO 13526, §1.2(a) b) ISOO Implementing Dir., §2001.24(a) c) ICD 710	May not be used with any other classification marking.
UNCLASSIFIED	None	(U)	None	a) EO 13526, §1.6(c) b) ISOO Implementing Dir., §2001.24(a) c) ICD 710	May not be used with any other classification marking. May be used with some dissemination controls. Unclassified information is withheld from public release until approved for release by the originator.

2. (U) Non-US Protective Markings

(U) For additional information regarding Non-US Protective Markings refer to the *Manual*.

(Table is UNCLASSIFIED)

Marking Title	Authorized Abbrev	Authorized Portion Mark	Marking Sponsor	Policy Basis	Relationship to Other Markings
Non-US Protective Markings					
//ISO 3166 Trigraphic Country Code or Int'l Org Code plus Classification (e.g., "//DEU SECRET" for German SECRET Document)	None	((/Relevant ISO 3166 Trigraphic Country Code or Int'l Org Code plus Non-US classification portion mark)	Respective Country or Int'l Org	a) EO 13526, §1.6(e) b) ISOO Implementing Dir., §2001.24(c) and §2001.26(a)(6)	May only be used with the non-US markings TOP SECRET, SECRET, CONFIDENTIAL, RESTRICTED, or UNCLASSIFIED.

(U) NATO and UN RESTRICTED Markings

(U) As described in NATO guidance (MC101/13 and Enclosure "E" to C-M(2002)49), NATO information may also have control markings to identify information with specific access requirements (e.g., ATOMAL, BOHEMIA) or dissemination limitation markings (e.g., ORCON). NATO markings also utilize separators between marking categories (e.g., CTS-B or CTS-B/ORCON). When these control markings are translated they are to be applied after the NATO classification level using the same syntax and format as the *Register* for similar US control markings categories (e.g., //COSMIC TOP SECRET//BALK//ORCON). Due to security restrictions, not all NATO control markings are included in this *Manual*. The values in the table below are not an exhaustive list of all possible protective markings used by NATO and the United Nations. Contact CAPCO for questions or concerns regarding unpublished NATO markings.

(Table is UNCLASSIFIED)

Marking Title	Authorized Abbrev	Authorized Portion Mark	Marking Sponsor	Policy Basis	Relationship to Other Markings
NATO Classification Markings					
//COSMIC TOP SECRET	None	((/CTS)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with NOFORN or EYES ONLY.
//NATO SECRET	None	((/NS)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with NOFORN or EYES ONLY.

Marking Title	Authorized Abbrev	Authorized Portion Mark	Marking Sponsor	Policy Basis	Relationship to Other Markings
//NATO CONFIDENTIAL	None	(//NC)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with NOFORN or EYES ONLY.
//NATO RESTRICTED	None	(//NR)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with NOFORN or EYES ONLY.
//NATO UNCLASSIFIED	None	(//NU)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with NOFORN or EYES ONLY.
NATO Special Category Markings					
ATOMAL	None	(ATOMAL)	NATO	US Security Authority for NATO (USSAN) 1-07	May only be used with NATO classification markings COSMIC TOP SECRET, NATO SECRET, or NATO CONFIDENTIAL. Cannot be used with NOFORN or EYES ONLY.
BOHEMIA	None	(BOHEMIA)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with BALK, NOFORN, or EYES ONLY. Requires COSMIC TOP SECRET.
BALK	None	(BALK)	NATO	US Security Authority for NATO (USSAN) 1-07	Cannot be used with BOHEMIA, NOFORN, or EYES ONLY. Requires COSMIC TOP SECRET. Replaces BOHEMIA in an exercise scenario.
United Nations Classification Marking					
UN RESTRICTED	None	None	United Nations	Refer to the appropriate CONOPS.	Cannot be used with any other type of classification and/or control markings.

3. (U) Joint Classification Markings

(U) JOINT classified information for which the US is a co-owner no longer carries an implied release to the co-owners and requires the appropriate foreign disclosure or release marking at the portion and banner level per ICD 710, § G.

(U) For additional information regarding Joint Classification Markings refer to the *Manual*.

(Table is UNCLASSIFIED)

Marking Title	Authorized Abbrev	Authorized Portion Mark	Marking Sponsor	Policy Basis	Relationship to Other Markings
Joint Classification Marking					
//JOINT [classification] plus ISO 3166 Trigraphic Country Codes/Int'l Org Codes (e.g., "//JOINT SECRET DEU USA//REL TO USA, [list]" for a joint German and USA SECRET Document)	None	//JOINT + class. portion mark + Relevant ISO 3166 Trigraphic Country Codes/Int'l Org Codes//REL TO USA, [list]") The country list must be expanded if the portion's country/int'l org. list is different from the banner line JOINT marking. //JOINT + class. portion mark//REL) May be used if the portion's country/ int'l org. list is the same as the banner.	Respective Countries/Int'l Orgs	a) EO 13526,§ 6.1 (r)(2) b) ICD 710	May only be used with the non-US markings TOP SECRET, SECRET, CONFIDENTIAL, RESTRICTED, or UNCLASSIFIED. RESTRICTED is the non-US classification for which there is no US equivalent marking and shall not be used when USA is one of the co-owners. The JOINT marking in the banner line indicates co-ownership and implied releasability of the entire document only to the co-owners. All JOINT information is withheld from further release until approved for release by the co-owners.

4. (U) SCI Control System Markings

(U) Classified information, as defined by and under the purview of ICD 710, shall be explicitly marked for appropriate foreign disclosure or release at the portion and banner level. Originators of information are responsible for determining appropriate classification markings for the information they produce, and for applying the appropriate control markings that implement DNI guidelines for dissemination (foreign and domestic).

(U) For additional information regarding SCI Control System Markings refer to the *Manual*.

NOTE: All SCI control systems, compartments within control systems, and sub-compartments within compartments shall be ordered alpha-numerically (this ordering guidance applies for both published and unpublished markings).

(Table is U//~~FOUO~~ in aggregate, all portions are UNCLASSIFIED unless marked otherwise)

7. (U) Foreign Government Information Markings

(U) Classified information, as defined by and under the purview of ICD 710, shall be explicitly marked for appropriate foreign disclosure or release at the portion and banner level. Originators of information are responsible for determining appropriate classification markings for the information they produce, and for applying the appropriate control markings that implement DNI guidelines for dissemination (foreign and domestic).

(U) ICD 710 is not applicable to classified military information falling under the purview of National Policy and Procedures for the Disclosure of Classified Military Information to Foreign Governments and International Organizations (short title: National Disclosure Policy-1 (NDP-1)). Within the Department of Defense, application of foreign release markings is accomplished by the Foreign Disclosure Officer (FDO) when foreign release is needed.

(U) For additional information regarding FGI Markings refer to the *Manual*.

(U) CAPCO Register Annex A – Tetragraph Table, Registered International Organizations and Alliances (classified, releasable)

(U) Tetragraphs are four-character codes used to represent international organizations, coalitions, and alliances for purposes of disclosure, release, or indicators of foreign government information (e.g., FGI, REL TO, DISPLAY ONLY). The tetragraph codes are authorized for use in accordance with the applicable U.S. foreign sharing arrangement. Contact the originating agency or your local foreign disclosure office for further guidance. Refer to the FGI and Dissemination Controls categories in the *Register* and/or *Manual* for guidance on using the tetragraph codes with other registered markings, formats, and authorized abbreviations.

(U) Tetragraph codes are not to be used as routing indicators. A routing indicator is a group of characters that specifies the routing instructions for the transmission of a message to intermediate points or to its final destination.

(U) *CAPCO Register Annex A* and *Annex B* have the same type of information. Two annexes have been made to allow for the broadest dissemination.

(U) ONLY THE VERSION OF ANNEX A POSTED ON THE CAPCO WEBSITE IS CONSIDERED VALID. Minor changes for member country/alliance lists may be made to this table without the issuance of a new version. Refer to the summary of changes provided below for a history of all changes to the table. All changes are announced on the CAPCO website.

(U) *CAPCO Register Annex A – Tetragraph Table* is available on the CAPCO home page on:

- **Intelink-TS at:** <http://www.intelink.ic.gov/sites/dnissc/capco>
- **Intelink-S at:** <http://www.intelink.sgov.gov/sites/ssc/capco>

(U) CAPCO Register Annex B – Tetragraph Table, Registered International Organizations and Alliances (classified, NOFORN)

(U) Tetragraphs are four-character codes used to represent international organizations, coalitions, and alliances for purposes of disclosure, release, or indicators of foreign government information (e.g., FGI, REL TO, DISPLAY ONLY). The tetragraph codes are authorized for use in accordance with the applicable U.S. foreign sharing arrangements. Contact the originating agency or your local foreign disclosure office for further guidance. Refer to the FGI and Dissemination Controls categories in the *Register* and/or *Manual* for guidance on using the tetragraph codes with other registered markings, format, and authorized abbreviations.

(U) Tetragraph codes are not to be used as routing indicators. A routing indicator is a group of characters that specifies the routing instructions for the transmission of a message to intermediate points or to its final destination.

(U) *CAPCO Register Annex A* and *Annex B* have the same type of information. Two annexes have been made to allow for broadest dissemination.

(U) ONLY THE VERSION OF ANNEX B POSTED ON THE CAPCO WEBSITE IS CONSIDERED VALID. Minor changes for member country/alliance lists may be made to this table without the issuance of a new version. Refer to the summary of changes provided below for a history of all changes to the table. All changes are announced on the CAPCO website.

(U) *CAPCO Register Annex B – Tetragraph Table* is available only on the JWICS CAPCO home page on:
